

XVW-P30 Wireless Range Extender

FIRMWARE VERSION 4.5.1

Upgrade Instructions

The XVW-P30 must be upgraded via Ethernet cable. We do recommend Factory Defaulting the P30 then performing the upgrade according to the following instructions.

NOTE: See the XVW-P30 QIG for instructions on how to Factory Default your device.

1. Make sure your XVW-P30 is powered up and you have saved the new P30 Firmware on your computer.
2. Connect an Ethernet cable to either port of the P30.
3. Open your web browser and go to <http://192.168.0.11/full/index.html>
4. In the left navigation menu select *'Firmware Update'*
5. Select *'Choose File'*, navigate to the location of the P30 Firmware, select it and choose *'Open'*.
6. Select *'Upgrade'* to begin the upgrade. When the firmware is finished upgrading the UI will become unavailable. Proceed to step 7.
7. The new Firmware's User Interface address is different than in step 3 above. To access the new User Interface after the upgrade go to: <http://192.168.0.11/quicksetup/display>
